Storage *

In your web browser

Where do you want to store this project?

Storing in your web browser removes limits on how big your project can be.
Storing in the cloud will let you access the project from any computer.
(See "What difference does it make where a project is stored?")

Activate Windows

Go to Settings to activate Windows

CREATE

"C1"

Train

Collect examples of what you want the computer to recognise

Train

Learn & Test

Use the examples to train the computer to recognise text

Learn & Test

Make

Use the machine learning model you've trained to make a game or app, in Scratch, Python, or EduBlocks

What have you done?

You have collected examples of text for a computer to use to recognise when text is Positive or Negative.

You've collected:

- 5 examples of Positive,
- 6 examples of Negative

What's next?

Ready to start the computer's training?

Click the button below to start training a machine learning model using the examples you have collected so far

(Or go back to the [Train](#) page if you want to collect some more examples first.)

Info from training computer:

[Train new machine learning model](#)

You have trained a machine learning model to recognise when text is Positive or Negative.

You created the model on Friday, July 24, 2026 2:57 PM.

You have collected:

- 5 examples of Positive,
- 6 examples of Negative

Try testing the machine learning model below. Enter an example text below, that you didn't include in the examples you used to train. It will tell you what it recognises it as, and how confident it is.

If the computer seems to have learned to recognise something, then you can go to Scratch and use what the computer has learned to make a game!

If the computer is getting too many things wrong, you might want to go back to the [Train](#) page and collect some more examples.

Once you've done that, click on the button below to train a new machine learning model and see what difference the extra examples will make!

Try putting in some text to see how it is recognised based on your training.

Test

Try putting in some text to see how it is recognised based on your training.

Test

✓ Recognised as **Negative**
with 90% confidence

Try putting in some text to see how it is recognised based on your training.

Test

Recognised as **Positive**
with 85% confidence

Try putting in some text to see how it is recognised based on your training.

Your performance is excellent

Test

Recognised as **Positive**
with 92% confidence
